- Holmen
- Madison
- Rib Falls
- Roberts

**INDIANA**

- Maxwell
- IOWA**
- Iowa City

**FLORIDA**

- Astatula

**ILLINOIS**

- Champaign
- Charleston
- Springfield

**CONCRETE  
VS. PLASTIC**

## Why Choose Concrete Pipe?

### Concrete pipe is:

- Engineered to perform as designed for the life of the project (typically 70-100 yrs).
- The most durable and sustainable material for infrastructure and major construction made entirely of natural materials.
- Maintains its value because of its rigidity and lack of maintenance or replacement once installed.
- The strongest pipe available; it can be designed and tested to meet any load requirement.

- The preferred choice for engineers and industry professionals for transportation infrastructure and storm water management systems.
- A pipe system delivered to the site that serves as structure and conduit because the strength comes from the pipe not the soil envelope. In contrast to plastic pipe that serves as a soil liner and relies on the structure being built in the field.

countymaterials.com

## OUR STORY SINCE 1946

Since 1946, our family-owned, American-based manufacturing company has grown into a diversified organization. Our team of nearly 1,500 employees provide concrete products for growing communities in more than 40 locations and six states.

We've proven ourselves as a leader in the concrete pipe and precast industry by implementing the latest manufacturing technologies and expanding our product offerings, all while surpassing our own high standards of excellence. County Materials is proud to play a pivotal role in the growth and development of our nation's infrastructure.

## WE ARE COMMITTED TO OUR COMPANY VALUES

- Team Members
- Safety
- Quality
- Customer Service

## JOBS! WE ARE HIRING

### Jobs We Offer Related to Pipe Production:

- Production Team Members
- Yard Team Members
- Drivers
- Dispatchers
- Sales Representatives
- Quality Control
- Operations Managers

We define our company's Vision with three words:  
**Success, Stability and Support.**
