Brand Guidelines
This is who we are

County Materials has progressed to become a national leader in the concrete construction & landscape industry. Founded in 1946, the company still holds true to its roots. Our American-based, family owned company employs dedicated team members who fulfill the company’s mission to build the communities where Americans live, work and play.

Continuous improvement, technological advancements and trusted responsiveness all rooted in years of experience, has led to County Materials playing a pivotal role in the growth and development of our nation’s infrastructure.

We want to maintain the integrity of our company brand that so many hard working men and women have built. Our brand guidelines are intended to portray the company’s image in a consistent and professional manner.

Questions?
We appreciate your efforts in advance to consistently maintain our corporate identity. Should you have any questions regarding usage of our corporate logo mark or any other County Materials brand assets please contact the Branding Specialist in the County Materials marketing department.

Phone: (800) 289-2569
E-Mail: marketing@countymaterials.com
Our Company Logo and Emblem

Our company logo helps people establish a relationship and create a connection with our company. The County Materials Corporation logo is the symbol or face of the organization. It is meant to inspire an immediate recognition of our company’s brand, our Vision and core Values, and our products and services.

County Materials’ Primary Company Logo

County Materials’ primary logo is an integral part of the company’s brand and should be used thoughtfully and consistently. County Materials’ primary logo is comprised of the “C” emblem in combination with our wordmark or name ‘COUNTY MATERIALS CORPORATION.’ The wordmark will appear in all capital letters and in our immediately-recognizable, distinct typeface that, even without images can be used to identify the brand. When either the emblem or the wordmark are used individually they may help to identify our organization, but they are not considered our company’s logo and must be used according to the style guide recommendations.

Primary Company Logo with Horizontal Orientation

Primary Company Logo with Vertical Stack Orientation

Understanding the wide range of applications, the County Materials logo will be utilized in, we have provided an alternate primary company logo orientation. We always recommend using the horizontal orientation first, but both the horizontal and vertical orientations are equally strong and communicate the County Materials brand consistently. The vertical stack orientation is the only acceptable alternate arrangement for County Materials’ primary company logo. In the vertical stack orientation, the “C” emblem is vertically centered above the stylized wordmark ‘COUNTY.’

Primary Company Logo Colors

The County Materials primary logo (horizontal) and the alternate logo (vertical) should be printed or utilized in the standard 3-colors. The standard color combination looks best on a white background. The County Materials logo is made up of 3 primary colors: Black, Red & White. Find the Pantone CMYK, HEX & RGB color formulas in Appendix A.

<td>HEX 000000</td>
</tr>
</tbody>
</table>
County Materials’ Secondary Company Emblem

County Materials’ secondary company emblem is comprised of the “C” emblem. The secondary company emblem is used to identify the company and is the mark of our organization. It is not to be treated as a design element or accent. It’s our “pointer” which appears either as part of our primary company logo or on its own as a secondary company emblem used on our social media platforms, our website and other company collateral. The emblem signifies strength, dynamic growth and professionalism.

County Materials’ Secondary Company Wordmark

When the name ‘COUNTY MATERIALS CORPORATION’ appears as text without the emblem, it will appear in all capital letters, so it represents our immediately-recognizable, distinct typeface that, even without our emblem, can be used to identify our brand.

COUNTY MATERIALS CORPORATION

County Materials secondary company emblem and secondary company wordmark are reserved for special projects designated by Marketing. They may be used sparingly in place of the primary company logo in the following instances:

- The secondary company emblem may be used when the primary company logo or secondary company wordmark is already displayed on the same page/content area.
- The secondary company emblem may be used when the primary company logo is not recommended because of space and size restrictions, competing background imagery, redundancy, or other design issues and the secondary company wordmark is displayed on the same page/content area.

Don’ts when using the Primary Company Logo and Secondary Company Emblem:

- Don’t rotate the logo or emblem
- Don’t squash, stretch or alter the proportions of the logo or emblem
- Don’t place other elements in the clear spaces of the logo or emblem
- Don’t resize any part of the logo or emblem
- Don’t rearrange parts or create compositions of the logo or emblem that are not already provided in this guide
- Don’t add unofficial graphics to the logo or emblem
- Don’t use unauthorized colors with the logo or emblem – refer to the Color Usage section
- Don’t add drop shadows or other text styles to the logo or emblem
- Don’t contain the logo or emblem in a box when used on a background
- Don’t use the emblem directly next to or close to the full primary company logo because it’s repetitive and isn’t a good use of the brand elements
- Don’t use other typefaces or font treatments with the logo or emblem that are not already provided in this guide
Logo Usage

Clear space
It is important to keep the County Materials logo clear of any other graphic elements. Keep other graphic elements or messages out of this exclusion zone.

Background Control
By controlling the background in which the logo is placed, legibility and maximum impact are assured. When developing a layout or choosing an environment in which to place the logo, observe the following:

- Evaluate the background. If it is a photo, pattern or color that could obscure or compete with the logo, consider a less busy image, modify the background or redesign the layout to eliminate the conflict.
- Review the logo formats. It may be more appropriate to reverse the logo on certain dark backgrounds. Ensure that your background provides the logo with sufficient contrast in terms of color and readability.

This is a good example of the right way to use the logo. Contrast is excellent between all elements.

Adding a drop shadow creates a poor contrast between the logo and background.

Adding a glow may help create contrast between the logo and background but is not preferred.

Logo is placed on too dark of an image. The black logo does not have enough contrast to stand out.
Alternate Company Logo Colors

If color reproduction is not available or if the background is a color other than white, the following alternatives may be utilized:

Black & White
The black & white version of the logo is preferred in single color applications.

Logo on Black
The logo on a black background can either be white and red, or solid white with a black “C” inside the emblem.

Color & Photo Backgrounds

Logo on Red
The logo, when on a red background, should be all black or all white with a red “C” inside the emblem.
The red background should be Pantone 186C Red or HEX cc0000.

Logo on Other Colors & Backgrounds
When placing the County Materials Logo on color backgrounds or over photos, utilize the all black, or all white logo to creates the most contrast.
The “C” inside the emblem should be transparent to match the background.
Fonts & Typography

Typography is a powerful brand tool when used consistently. We’ve defined the set of typefaces that best represent a strong, professional and modern feel for the County Materials brand and should be used across all print and web applications.

### Headlines:
**Myriad Pro Bold**
- Variable Size

### Subheads:
**Myriad Pro Semibold**
- 60% of headline size

### Non-headline emphasis:
**Myriad Pro Semibold**
- 10 pt font

### Body Copy
**Body Copy on light background:**
**Myriad Pro Light**
- 10 pt font / 12 pt leading

**Body Copy on dark background:**
**Myriad Pro Regular**
- 10 pt font / 12 pt leading

An acceptable alternative typeface is Myriad Pro SemiCondensed. This version of the font may be used in circumstances when text must be narrowed to fit into design layouts.
Company Slogan, Tagline & Statements

Logo Tagline:
Your Source for Concrete Construction & Landscape Products
• To be used in conjunction with our logo & web address in advertising

Company Slogan - Impact Statement:
Our products are used to build the communities where Americans live, work and play.
• To be used on corporate branding initiatives such as website and company brochure

History Statement:

Formatting Guidelines
• Use this layout to maintain consistency

Myriad Pro Semibold Semicondensed
• Same Width as logo - centered

Myriad Pro Semibold
• 50% larger than tagline - centered

American Flag Icon

Proud to be American based and American made since 1946

Formatting Guidelines
• Pre-formatted with History Statement
• Logo can stand alone
• White background preferred
Color Palettes

County Materials Primary Color Palette  
see appendix A for details

- Pantone 186 C 90%
- Pantone 186 C 75%
- Pantone 186 C 60%
- Pantone 186 C 45%
- Pantone 186 C 30%
- Pantone 186 C 15%

Guidelines
The County Materials Primary Color Palette helps promote the strong, clean look & feel of the County brand. Marketing collateral with a heavy presence of high quality photographs should utilize this primary palette.

County Materials Secondary Color Palette  
see appendix B for details

Guidelines
The County Materials Secondary Color Palette mimicks the warm earth tones that embodies the products County Materials manufactures and the environments these products are used in. These colors should be used sparingly in place of photography when a design element must be created to add depth to a campaign.

Groundwork Newsletter Color Palette  
see appendix C for details

Guidelines
The Groundwork Newsletter will utilize this color palette in addition to County Materials’ primary colors. This color palette creates an engaging and inviting presence fitting for team member news & information.
**GUARD for Life Color Palette**

<table>
<thead>
<tr>
<th>GUARD Orange</th>
<th>Black</th>
<th>GUARD Yellow</th>
</tr>

County Materials manufactures products that build the communities where Americans live, work, and play. The images that capture this sentiment are warm and earhtoned with splashes of vibrant color and hints of blue-grey skies. The mood is upbeat and friendly with a touch of ruggedness.

Color gradient overlay

Color gradient overlay

Black screen over posed photo

Random color screen over photo

White gradient covers foreground
Photography: Design Elements

County Materials is best represented with high quality photography and crisp clean lines. Use the County Materials standard color palette to add pops of color and bold design elements.

Acceptible Uses

The red and white color bars are consistent with the County Materials Standard Color Palette. The text and County Materials Logo contrast sufficiently with the background.

Unacceptable Uses

Changing the opacity of design elements may alter established colors beyond recognition. Changing the opacity of the text and County Materials logo reduces the contrast. Best Practice: Do not change the opacity of the established standard color palette to a point that they no longer resemble the original color. Be aware of the effect of background colors.

Earhtone design elements using colors other than the established standard color palette is not consistent with the County Materials Brand Guidelines. Avoid outlines, borders, and gradients.
Website & Digital Media

www.countymaterials.com is an extensive resource for a variety of audiences. From architects, engineers, and designers to contractors & installers, to homeowners, team members and applicants. The look and feel of the County Materials website is consistent with the County Materials brand experience. Strong photographic imagery takes center stage with a crisp clean background.

Web Safe Color Palette

County Materials digital media should follow basic brand guidelines for color direction. Additionally, these web safe colors should be utilized. Two additional reds have been added for special effects.

Social Media

Social Media Image Sizes
Cover Photos/Images stretch across our entire company profile home page providing an opportunity to make a powerful impression. It is a means of visually enriching our online story. Our cover image photos, visuals, fonts and colors will be consistent with our company’s style guide.

Our unique banner designs should be visually cohesive across our social platforms. Use the same banner design, colors, format and content for both Facebook and Linkedin. Retain our recognizable brand color palette, even if the text or the imagery in the design changes from one banner theme/season/industry event to the next.

Background Image
We will use visuals that are clear, relevant and high quality. The image shouldn’t be too overwhelming. Bright, bold, tightly-knit, tiny patterns filling a big block of space is too much. Opt for a simple striking photo or graphic and include negative space so people can focus in on whatever we want to hold their attention. Make sure to look out for the areas that will be covered up by our profile picture, our name, and a row of action buttons.

For the best image quality across multiple devices, use the dimensions below for Social Images:

**Facebook**
- Cover Image: 830 x 312. For best results, upload an RGB JPG file less than 100 KB.
- Post Image: 1200 x 630. For best results, upload an RGB JPG file less than 100 KB.

**Linkedin**
- Cover Image: 1536 x 768. For best results, upload an RGB JPG file less than 100 KB.
- Post Image: 1104 x 736. For best results, upload an RGB JPG file less than 100 KB.

Key Design Elements
These key elements include color, prominent and compelling imagery, simplified text, and our company logo with or without a slogan.

- Incorporate a subtle use of County Materials’ primary company color palette, namely red, to highlight and bring attention to key areas of the design and action items.
- Use approved secondary colors as a full or partial background color or accent.
- Choose simplified text using approved company typeface.
- Select prominent and compelling imagery.
- Use white space to allow the eye to rest and create a simplified, easy-to-read design.
- Use the same banner/header design template for holidays and industry recognition events.
- Select photos and graphics that keep our brand’s aesthetic and color choices in mind. The posts should flow seamlessly into each other.
- Devote more space to the image(s) than text.
