Material Name: Natural Sand

Section 1: Identification

1.1 Product trade names: Mason sand, concrete sand, manufactured sand, mound sand and other natural sand blends and/or combinations.

1.2 Product Class: Natural Sand Products

Product Codes: N/A

CAS/EC Number: Mixture (composition detailed in Section 3)

Intended Use: Design for landscape use, construction use, or as fill material.

1.3 Supplier:

County Materials Corp.
205 North St., P.O. Box 100
Marathon, WI 54448-0100

General Information Telephone: (800) 289-2569

Email: riskclaimssafety@countymaterials.com

1.4 Emergency telephone:

715-223-7788

Section 2: Hazard(s) Identification

2.1 Classification:

- Carcinogenicity – Category 1A
- Specific Target Organ Toxicity (Single Exposure-Respiratory System) – Category 3
- Specific Target Organ Toxicity (Repeat Exposure-Respiratory System) – Category 1

2.2 Labeling:

Pictograms:

Signal Word: DANGER

Hazard Statements

- H335 – May cause respiratory irritation
- H351 – Suspected of causing cancer
- H372 – Causes damage to the organs (respiratory system) through prolonged or repeated exposure.

Precautionary Statements

- P201 – Obtain special instructions before use.
- P202 – Do not handle until all safety precautions have been read and understood.
- P261 – Avoid breathing dusts.
- P271 – Use only outdoors or in a well-ventilated area.
- P280 – Wear protective gloves/protective clothing/eye protection/face protection.

Response

- P304 + P340 + P312 – IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a doctor if you feel unwell.
- P308 + P313 – IF exposed or concerned: Get medical advice/attention.
Material Name: Natural Sand

Section 2: Hazard(s) Identification

Storage
P403 – Store in a well-ventilated place.
P405 – Store locked up.

Disposal
P501 – Dispose of contents in accordance with local/regional/national/international regulations.

2.3 Other Hazards: This product is classified based on the dust/particulate generated during agitation. Potential hazards are related to particulate exposure. Exposure to entrained dusts can cause acute and chronic health problems. Sand is a naturally occurring mineral complex that contains variable quantities of quartz (crystalline silica). Crystalline silica is a naturally occurring constituent in sand that may cause cancer. Sand may be subjected to various natural or mechanical agitation that results in airborne (fugitive) dust that may contain crystalline silica. Prolonged inhalation of crystalline silica may cause silicosis or cancer according to IARC and NTP. Other forms of crystalline silica (cristobalite/tridymite) may also be naturally present or formed during mechanical processes.

Section 3: Composition/Information on Ingredients (1)

| Amorphous (fused) Silica (2) | 231-545-4 | 7631-86-9 | Varying | 1. This product's composition varies naturally. Sand may contain up to 100% crystalline silica (quartz). Crystalline silica is a known carcinogen.  
2. EINECS/EC number for Amorphous silica is a general silica number. |

Section 4: First-Aid Measures

4.1 Description of first aid measures:

**Inhalation:** Airborne dust may be inhaled. If breathing becomes difficult, remove person immediately to fresh air. SEEK MEDICAL ATTENTION IMMEDIATELY if person is unconscious or if breathing difficulty continues. Give artificial respiration and CPR if necessary.

**Skin Contact:** Treat symptomatically. Cuts and abrasions should be cleaned and bandaged. Rinse with clean potable water. If irritation develops or persists, seek medical attention.

**Eye Contact:** Rinse eyes thoroughly with potable water for at least 15 minutes and remove contacts if easy to do. Rinse under eyelids to remove any particles. Seek medical attention for abrasions.
Material Name: Natural Sand

Section 4: First-Aid Measures

**Ingestion:** Although highly improbable, if the person is conscious and aware, give large amounts of water. Never attempt to make an unconscious person drink or vomit. If the person is unconscious it may be necessary to sweep the blockage out of the mouth using a finger. Seek emergency medical attention if deemed necessary.

4.2 **Most important symptoms and effects:**

**Inhalation:** May cause irritation of the respiratory tract. May cause allergic or asthma-like respiratory reactions.

**Skin Contact:** May cause irritation, cuts or abrasions.

**Eye Contact:** May cause severe irritation, abrasions, redness, tissue destruction and permanent eye damage including blindness in extreme cases.

**Ingestion:** Expected to be virtually nontoxic. Ingestion of large amounts may cause gastrointestinal irritation, choking/blockage.

4.3 **Indication of any immediate medical attention and special treatment needed:** See Section 4.1.

Section 5: Fire-Fighting Measures

5.1 **Extinguishing media:** Product is not flammable. Use appropriate media for fire adjacent to product.

5.2 **Special hazards arising from the substance or mixture:** None known.

5.3 **Advice to firefighters:** None.

Section 6: Accidental Release Measures

6.1 **Personal precautions:** Wear appropriate protective equipment and clothing during clean-up as recommended in Section 8. Use caution and avoid breathing dust. Wear dust-mask or respirator if airborne concentrations approach or exceed exposure limits. Avoid sweeping spilled product as airborne silica may be generated.

6.2 **Environmental precautions:** Product is not an environmental hazard.

6.3 **Methods and materials for containment and cleaning up:** Shoveling or vacuuming. Avoid sweeping to limit airborne dust.

6.4 **Reference to other sections:** Use information obtained throughout this SDS to be fully prepared in case of accidental release.

Section 7: Handling and Storage

7.1 **Precautions for safe handling:** Avoid contact with skin, eyes, and clothing. Persons handling the product should wear recommended personal protective equipment (PPE) as noted in Section 8. Wash thoroughly with potable water and mild soap after handling. Avoid breathing dust. Ensure adequate ventilation (or a respirator should be worn if exposure limits are approached or exceeded). Use local exhaust or perform activities in well-ventilated areas. Water suppression may be used to limit airborne dusts. Avoid excessive agitation.

7.2 **Conditions for safe storage, including any incompatibilities:** Avoid incompatible materials such as powerful oxidizing agents like fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen difluoride they may cause fire and/or explosions.

7.3 **Specific end uses:** See Section 1 for intended uses.
Material Name: Natural Sand

8.1.1 Currently recommended monitoring procedures: No recommendations.

8.1.2 Exposure guidelines for air contaminants, if any: See Section 8.1

8.1.3 DNELS and PNECS for exposure scenarios: Information not available at this time.

8.1.4 Control banding for risk management: Use good industrial hygiene practice, where appropriate PPE and use local ventilation.

8.2 Exposure Controls:

8.2.1 Appropriate engineering controls: Use local exhaust ventilation when possible to remove and prevent buildup of any dusts generated from the handling of this product. Water suppression may also be used to limit airborne dusts during application or use.

8.2.2 Individual protection methods: Use good industrial hygiene practices in handling this material. Eye wash stations should be available. Wash exposed skin thoroughly with potable water and mild soap after use. If any irritation or redness is noted, treat symptomatically or consult a doctor immediately. Wear gloves, safety glasses and protective clothing. Safety shoes (steel toe) should be worn when handling heavy materials that could be dropped on the feet. In case of eye contact with projectile debris or dust, flush with plenty of clean, potable water for at least 15 minutes. Remove contacts if easy to do so. Seek medical attention immediately. Avoid dust inhalation and direct contact with skin and eyes. Wash contaminated skin before eating, drinking or smoking.

   Eye/Face: Use appropriate eye protection: glasses with side shields or googles. Dust goggles or a face shield (preferred) should be worn during cutting, grinding crushing, or drilling activities.

   Skin: Avoid contact by covering skin with protective clothing or protective suit. Wear leather heavy-duty gloves when handling the product. Wear eye protection. Wash exposed skin thoroughly with potable water and mild soap.

   Respiratory: If airborne concentrations are above the applicable exposure limits, use NIOSH-approved respirator if qualified.
Section 9: Physical and Chemical Properties

- **Physical State:** Granular Particles
- **Color:** Varying tan/gray/brown shades
- **Odor:** Odorless
- **Odor Threshold:** Not applicable
- **Melting Point:** Not applicable
- **Freezing Point:** Not applicable
- **Initial Boiling Point:** Not applicable
- **Melting Point:** Not applicable
- **Freezing Point:** Not applicable
- **Flash Point:** Non-flammable
- **Auto-Ignition Temperature:** Not applicable
- **Decomposition Temperature:** Not evaluated
- **pH:** Not applicable
- **Kinematic Viscosity:** Not applicable
- **Solubility:** Non-soluble
- **Partition Coefficient:** Not applicable
- **Vapor Pressure:** Not applicable
- **Density (and/or Relative Density):** Not evaluated
- **Relative Vapor Density:** Not applicable
- **Particle Characteristics:** Variable sizes (fine or course grain sizes)

Section 10: Stability and Reactivity

10.1 **Reactivity:** May react with incompatible materials: fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen difluoride.

10.2 **Chemical stability:** Stable

10.3 **Possibility of hazardous reactions:** Avoid incompatible materials such as powerful oxidizing agents like fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen difluoride that may cause fire and/or explosions. Silica dissolves readily in hydrofluoric acid producing a corrosive gas, silicon tetrafluoride. Avoid agitation. Calcium carbonate is incompatible with acids, alum, ammonium salts, mercury, hydrogen, fluoride, and magnesium.

10.4 **Conditions to avoid:** Avoid excessive handling which may generate dust concentration above permissible exposure limits.

10.5 **Incompatible materials:** Incompatible materials and possible hazardous reactions are detailed in Section 10.3.

10.6 **Hazardous decomposition or byproducts:** Highly improbable. Hazardous polymerization will not occur.

Section 11: Toxicological Information

11.1 **Information on toxicological effects:**

- **Acute Exposure and Symptoms:**
  - **Inhalation:** Dust may cause irritation of the respiratory tract. May cause allergic or asthma-like respiratory reactions.
  - **Skin Contact:** May cause irritation, cuts or abrasions.
  - **Eye Contact:** May cause severe irritation, abrasions, redness, tissue destruction and permanent eye damage including blindness (in extreme cases).
Section 11: Toxicological Information

**Ingestion:** Highly improbable. Virtually nontoxic. Ingestion of large amounts may cause gastrointestinal irritation, choking/blockage.

**Chronic Exposure:**
Prolonged inhalation of dusts may cause damage to the respiratory tract.

Repeated inhalation of concentrations of dusts, especially respirable crystalline silica (quartz, cristobalite, tridymite) for periods as short as six months have caused acute silicosis. Acute silicosis is a rapidly progressive, incurable lung disease that is typically fatal. Not all individuals with silicosis will exhibit symptoms (signs) of the disease. However, silicosis can be progressive, and symptoms can appear at any time, even years after exposure has ceased. Symptoms of silicosis may include, but are not limited to, the following: shortness of breath; difficulty breathing with or without exertion; coughing; diminished work capacity; diminished chest expansion; reduction of lung volume; right heart enlargement and/or failure. Smoking may increase the risk of developing lung disorders, including emphysema and lung cancer. Persons with silicosis have an increased risk of pulmonary tuberculosis infection.

Several studies of persons with silicosis also indicate an increased risk of developing lung cancer, a risk that increases with duration of exposure. Many of these studies do not account for confounding variables for lung cancer, especially smoking.

**Acute and Chronic Toxicity**

**Component Analysis:** LD50/LC50 for exposure to particulate forms of the product’s components.

**Calcium Carbonate (1317-65-3):** No data available

**Silica, Quartz (Crystalline, Silica) (14808-60-7):** LD50 oral rat >500 mg/kg.

**Component Carcinogenicity**
Sand is not listed as a carcinogen by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP), the Occupational Safety and Health Administration (OSHA), the American Conference of Governmental Industrial Hygienists (ACGIH), or the State of California. In October 1996, an IARC Working Group re-assessing crystalline silica, a component of this product, designated crystalline silica as a carcinogen (Group 1). The NTP, ACGIH, and the State of California have listed crystalline silica (respirable size) as a known human carcinogen. This information is based on sufficient evidence of carcinogenicity in certain experimental animals and on selected epidemiological studies of workers exposed to crystalline silica.

**Specific Target Organ Toxicity Single/Repeat Exposure – Respiratory System**
Inhalation of dust can be a respiratory system irritant. Inhalation of high concentrations of dust, especially respirable crystalline silica (quartz, cristobalite, tridymite), for periods as short as six months has been known to cause acute silicosis. Silicosis is a rapidly progressive, incurable lung disease that can be fatal. Silicosis may have adverse effects on both the cardiac and pulmonary systems.
Material Name: Natural Sand

Section 11: Toxicological Information

Skin Sensitizer
Not expected to be a skin sensitizer.

Section 12: Ecological Information (non-mandatory)

12.1 Ecotoxicity:

General Product Information: Product when used as intended is not hazardous to the environment.
Component Analysis - Ecotoxicity: No ecotoxicity data are available for this product's components.
Environmental Fate: No information available for the product.

Section 13: Disposal Considerations (non-mandatory)

13.1 Waste treatment methods:

General Product Information: Whatever cannot be saved or recovered for recycling should be disposed of according to state and local regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

Section 14: Transport Information (non-mandatory)

US DOT Information  IMDG  IATA
Not Regulated  Not Regulated  Not Regulated

Section 15: Regulatory Information (non-mandatory)

15.1 Safety, health, and environmental regulation:

US Federal Regulations
General Product Information: All components are on the U.S. EPA TSCA Inventory List.
Component Analysis: Components of this product are not listed as hazardous under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).
