

HOLLOW CORE

ROOF & FLOOR SYSTEMS

Residential Concrete Floor System. *A Unique Cost Savings!*

The sound, economical choice for your home.

County Materials' Hollowcore Residential Concrete Floor System is a concrete solution to your question of how to maximize useable space. Strong enough to create an elevated parking space, Hollowcore planking also exceeds standards for building codes and fire resistance.

As a homeowner, you want the most square footage for your dollar.

Consider County Materials' Hollowcore Residential Concrete Floor System money in the bank.

- High weight-bearing capacity: Precast, prestressed flooring plank will support virtually any residential vehicle. Take advantage of space above or beneath living areas, garages or carports.
- Versatile: Can be cut to virtually any size
- Built-in voids: Long, tubular spaces help conceal and ease the installation of utility wires, pipes or cables.
- Safety first: Acoustical-dampening qualities and fire-resistance ratings make it a sound choice as roofing above a family room.
- The solution: Maximize your living space, and make those challenging lots work for you rather than against you with County Materials' Hollowcore Residential Concrete Floor System.

Save time at your work site with precast Hollowcore Residential Concrete Floor System from County Materials. This prestressed product also features tubular voids that make it lighter, easier to work with and a snap for utility runs.
