

Dimetta Pavers®

For a subtle accent or dramatic one-of-a-kind project, Dimetta Pavers test the limits of design possibilities and visual effect. Using complimentary color combinations, turn and arrange units to create stunning three-dimensional effects. Or select contrasting colors to create corporate logos, residential monograms, and other unique horizontal elements. Accent small spaces with flair, or create a central focal point in larger driveways, plazas and courtyards. Produced with a 3-1/8 thickness, Dimetta Pavers accommodate pedestrian and low speed, vehicular traffic.

Dimetta Pavers® are available as Special Production orders. Call for availability.

* Textured paver and patio stone surfaces require a buffer between the plate compactor and the paver surface to prevent scuffing. Refer to County Materials' Interlocking Concrete Paver or Slab Installation Guidelines, or contact County Materials for information.

* Making (2) cuts from corner to corner on one unit allows for a multitude of additional pattern designs.

* When working around an object (i.e. firepit) make sure to use string lines for proper alignment, keeping joints and tips in line.

* Keep joints snug but not tight- Allow enough room to accommodate slight adjustment in units to keep joints in line, especially when multiple points come together in a pattern.
