Renewable® Pavers
Permeable & Sandset
Featuring Genesis Face-mix Technology™

Renewable™ Pavers feature larger joints that accommodate drainage aggregates in permeable applications. Each paver can also be manufactured as sand set units with smaller hidden tabs that hold jointing sand for non-permeable installations.

The color photos shown were prepared with careful attention to accuracy. However, colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete units are manufactured with high-quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry.
