

Pole Pads

'Practically' perfect; gain a foothold with County Materials' pole pads

Pole Pads
14", 12", 8" Diameter x 3 5/8" Deep

Simple. Efficient. Useful.

All appropriately describe concrete pole pads from County Materials.

The pads come in three sizes and serve as a practical way to provide stability under buildings or structures requiring support posts.

Quicker and easier than mixing, pouring and curing concrete, our circular precast pole pads measure 3 5/8 inches deep. County Materials has added to its

14- and 12-inch diameters a new 8-inch size, ideal for do-it-yourselfers.

Made of high compressive-strength concrete, these units serve as a strong, smooth anchor for freestanding signage, or as footings for pole sheds or deck posts.

To find out how our concrete pole pads can meet your needs, contact your local County Materials representative.
