

Landscape Step Units

Landscape Step Units feature a natural-looking stone texture on their front face and decorative beveled front edge that compliments County Materials' pavers and retaining wall systems. A smooth stepping surface provides solid and safe footing. Their size speeds up installation time for steps and reduces the amount of retaining wall block needed. Landscape Step Units can also be cut onsite to fit project needs.

Oversize Landscape Step Units

The optimal finishing touch to any landscaping masterpiece: Oversize Landscape Step Units. Oversize step units are a functional option for a variety of step applications, including traditional or free-flowing staircases, landings, water features, walls or accents. Manufactured with uniform heights and a naturally textured surface, their consistent rise enhances

pedestrian comfort and safety. Their larger scale also covers more square footage than alternative step options, speeding installation and reducing labor costs. With their natural rock outcropping appearance, Oversized Landscape Step Units offer an organic appeal to landscape projects.
