

Navaro[®] Retaining Wall System

Structural strength and distinctive character are combined in the Navaro Retaining Wall System. Its rounded split face affords a hand-cut stone appearance. High-strength polyresin pins firmly lock each unit into place and ensure accurate alignment. The Navaro Retaining Wall System is an ideal solution for raised patios, steps, planting beds, erosion control and terraces. With geosynthetic reinforcement and engineering, taller Navaro Retaining Walls can be constructed.
