

# Ready-Mix Concrete

Applications, Products & Services

Manufactured in the USA by

# Agricultural

**Ready-Mix Concrete** is a versatile construction material with enduring properties and endless possibilities. From milking parlors to swimming pools, and everything in-between, ready-mix concrete delivers durability and longevity to meet the demands of diverse applications.

Feed Pad

## Agricultural

Whether its barn flooring, manure pits, or silo pads, agricultural applications are among some of the most demanding working environments. County Materials provides specifically designed, environmentally conscious concrete mixes to withstand these tough conditions over an extended service life. Ready-mix concrete is a low-maintenance solution that affords agricultural operations greater efficiency.

### **A Comprehensive Solution for Agricultural Applications:**

- Barn and Outbuilding Flooring
- Grain Bins
- Manure Pits
- Milking Parlors
- Silo Pads
- Feed Pads

County Materials' Ready-Mix is approved by the Natural Resources Conservation Service and the American Concrete Institute.

## Commercial, Municipal & Residential

Offering reliable strength and unmatched design flexibility, ready-mix concrete is an ideal solution for a variety of applications. Discover how admixtures and integral colorants can be used to help your project achieve its full potential.

### A Cost-Effective Solution for Diverse Applications:

- Driveways
- Patios and Courtyards
- Industrial Facilities
- Mid- and High-Rise Structural Concrete Framing
- Parking Lots and Parking Deck Ramps
- Recreation (Skate Parks, Walkways, and more)
- Retail Buildings
- Swimming Pools and Splash Pads
- Educational Structures
- Municipal Sidewalks, Curbs and Gutters

County Materials' Ready-Mix is approved by the Natural Resources Conservation Service and the American Concrete Institute.

Colored & Stamped Concrete

## Your Comprehensive Concrete Products and Services Provider

- **Colored & Stamped Concrete** – We offer specially formulated pigments and a complete line of stamping tools to help you achieve one-of-a-kind results.
- **Concrete Stamping Tools & Supplies Rental Program** – Our collection of concrete stamp patterns, accessories, and supplies are available to rent for concrete professionals.
- **Concrete Fiber Reinforcement** – We offer a full line of fiber reinforcement from leading fiber manufacturers.
- **Flowable Fill** – A fluid, self-leveling, low-strength material used as backfill and a replacement for granular sub-base. Also known as Controlled Low-Strength Material (CLSM).
- **Lightweight Concrete** – A low density concrete solution that can be designed to achieve the strength, durability, and other performance characteristics of standard concrete.
- **Pervious Concrete** – A special type of concrete with high porosity that allows for enhanced drainage while maintaining its strength. Ideal for pedestrian walkways, parking lots, and drainage structures.
- **Professional Performance Concrete** – We offer mix designs for any application.
- **Self-Consolidating Concrete** – A high-performance concrete that can flow easily into tight and constricted spaces without separating or requiring vibration. Also known as self-compacting, self-leveling, or self-placing concrete.
- **Telebelt® Material Conveyor** – Simplify difficult jobs by using a Telebelt. Its telescoping boom extends to 105 feet to place concrete in hard-to-reach places. Contact our Central Wisconsin Region Ready-mix Dispatch at (715) 845-2100 for more information and scheduling.

# Testing Services

## Testing Services

Specializing in aggregates, concrete and construction materials, County Materials' Testing Laboratory offers comprehensive sampling, testing, and failure analysis for aggregates, concrete and related construction materials. Our quality control team has over 50 years of combined experience and participates in several qualification programs, including WisDOT, WRMCA, and ACI.

All testing is performed in accordance with ASTM, AASHTO, and DOT guidelines or design specification requirements.
