

Elements Paving Stones™

Elements Paving Stones offer an elegant yet simple appearance that seamlessly integrates into any environment. Manufactured with superior surface durability, Element Paving Stones' flat surface and slightly chamfered edges embody fine cut jewels for a feeling of ultimate luxury. Units are designed for those looking for the perfect balance

between technical functionality and aesthetic appeal. Element Paving Stones have uniform shapes and dimensionally compatible sizes to create uncomplicated presentations. Additionally, Elements Paving Stones are available in many unique color blends and surface treatments for boundless possibilities of expression and composition.

* Textured paver and patio stone surfaces require a buffer between the plate compactor and the paver surface to prevent scuffing. Refer to County Materials' Interlocking Concrete Paver or Slab Installation Guidelines, or contact County Materials for information.

Elements Paving Stones™ Layer Patterns

Note: 4 x 4 fillers (see black squares in illustration for layer pattern "A") are used to keep the integrity of a layer when placed by a machine. They are no charge and not sold separately. If 4 x 4 fillers are used in a pattern and more are needed, installers can cut 4 x 8 pavers in half and install where needed.

Note: Because of our Hammered process, the layer pattern on a pallet of Hammered pavers will not match the layer pattern as illustrated. Hammered pavers also include (8) 4 x 4 fillers in each layer. The fillers are no charge and not sold separately. If fillers are used in a pattern and more are needed, installers can cut 4 x 8 pavers in half and hammer them to get the Hammered look.
